

Face Shield

Featuring Lexan™ 8010 Polycarbonate

Product overview

Everyone is smiling about things getting back to normal, and now you can see those smiles clearly with rp+m's Face Shields.

The shields keep your employees safe, comfortable and visible. They also keep costs down: with proper cleaning, the Face Shields can be safely reused.*

Our Face Shields come in two sizes to accommodate users' comfort and/or any additional PPE they may be required to wear. Both sizes feature an adjustable closure cord for additional comfort.

An optional foam insert is available for either length, this add-on creates some extra breathing room (3 inches of it, to be precise) between the forehead and front of the Face Shield. Popular with dentists and people who need to wear surgical loupes (or additional equipment) under their shields.

Composition

- Visor is medical grade acrylonitrile butadiene styrene (ABS) - ISO 10993 and USP Class VI
- Shield is Lexan™ 8010 Polycarbonate (complies with ANSI Z78.1 face shield protection .030"), which offers a clear, uncompromised field of vision
- Face Shield dimensions:
 - The Shortie (small): 15.5" x 9.25"
 - The Standard (large): 15.5" x 11.25"

Industry applications include:

- Medical, dental, veterinary
- Retail
- Barbers, hair and nail salons, spas
- Schools, daycare facilities
- Transportation, delivery services
- Hospitality, restaurant, food production

**When disinfecting or sanitizing your rp+m Face Shields, proper procedures should be taken. See below for recommended cleaning agents.*

← The Standard:

Our tried-and-true original provides complete facial coverage at 11.25" in length.

→ The Standard, shown with optional foam insert: Fits both sizes of Face Shields.

→ The Shortie:

Our newest Face Shield design offers a shorter length (9.25"). Don't worry, it still covers below the chin and allows for a full range of motion, just like The Standard.

To minimize the risk of damage, the following cleaning agents are recommended for this product:
BioMed, LLC Steriplex SD • Safetec of America Safetec surface wipes • CONTEC Healthcare Perodox RTU • CONTEC Healthcare Prostat sterile wipes PS-911EB • Generic hydrogen peroxide - pharmacy grade • Generic isopropyl alcohol - diluted with water to 30% strength • Generic hydrogen peroxide 28%, isopropyl alcohol, soap solution
